Code controller

```dart
import 'package:get/get.dart';
import 'package:flutter/material.dart';

class CounterController extends GetxController {
  var count = 0.obs;

  @override
  void onInit() {
    interval(count, (value) {
      Get.snackbar(
        "Interval Trigger",
        "Count saat ini: $value",
        snackPosition: SnackPosition.BOTTOM,
        duration: Duration(seconds: 1),
      );
    }, time: Duration(seconds: 2));

    super.onInit();
  }

  void increment() {
    count.value++;
  }
}
```

Code main

```dart
import 'controller/counter_controller.dart';

void main() {
  runApp(MyApp());
}

class MyApp extends StatelessWidget {
  @override
  Widget build(BuildContext context) {
    return GetMaterialApp(
      home: HomePage(),
    ); // GetMaterialApp
  }
}

class HomePage extends StatelessWidget {
  final CounterController controller = Get.put(CounterController());

  @override
  Widget build(BuildContext context) {
    return Scaffold(
      appBar: AppBar(title: Text("GetX Interval tes")),
      body: Center(
        child: Obx(() => Text(
            "Count: ${controller.count}",
            style: TextStyle(fontSize: 24),
          )), // Text // Obx
      ), // Center
      floatingActionButton: FloatingActionButton(
        onPressed: controller.increment,
        child: Icon(Icons.add),
      ), // FloatingActionButton
    ); // Scaffold
```
